

The Gift of Black Folk: The Negroes in the Making of America

Although the Civil War marked an end to slavery in the United States, it would take another fifty years to establish the country's civil rights movement. Dr. W.E.B. Du Bois was among the first generation of African-American scholars to spearhead this movement towards equality. As cofounder of the NAACP, he sought to initiate equality through social change, and as a talented writer, he created books and essays that provide a revealing glimpse into the black experience of the times. In *The Gift of Black Folk*, Du Bois recounts the history of African Americans and their many unsung contributions to American society. He chronicles their role in the early exploration of America, their part in developing the country's agricultural industry, their courage on the battlefields, and their creative genius in virtually every aspect of American culture. He also highlights the contributions of black women, proposing that their freedom could lead to freedom for all women. *The Gift of Black Folk* provides a powerful picture of the many struggles that paved the way for freedom and equality in our nation.
