

In the globalization game there are no absolute winners and losers. Neither homogenisation nor diversity can capture its contradictory movement and character. The essays and papers collected here offer, from a variety of perspectives, a rich exploration of creativity and innovation, cultural expressions and globalization. This volume of essays, in all their diversity of contents and theoretical perspectives, demonstrates the rich value of this paradoxical, oxymoronic approach - Stuart Hall, Emeritus Professor of Sociology at the Open University Volume 3 of the Cultures & Globalization series, Creativity and Innovations, explores the interactions between globalization and the forms of cultural expression that are their basic resource. Bringing together over 25 high-profile authors from around the world, this volume addresses such questions as: What impacts does globalization have on cultural creativity and innovation? How is the evolving world map of creativity related to the drivers and patterns of globalization? What are the relationships between creative acts, clusters, genres or institutions and cultural diversity? The volume is an indispensable reference tool for all scholars and students of contemporary arts and culture.
