

Five Days That Shocked the World(Eyewitness Accounts from Europe at the End of World War II) (Chinese Edition)

In the five days at the end of World War II, the world witnessed Mussolini's execution, the suicide of Adolf Hitler, and the fall of Berlin. The book tells the stories that happened in the five days. From April 28th to May 2nd 1945, with the advance of Allied forces into Germany and Italy, fascists lost their iron hand control to the people, and until then the world just understood how bad the European situation was. The author of this book, Nicholas Best, presents many faces in the war and skillfully integrates the stories told by dozens of figures.
