

Stephen Roach on the Next Asia: Opportunities and Challenges for a New Globalization

As Morgan Stanleys chief Asia specialist, getting Asia right is Stephen Roachs personal obsession. This in-depth compilation represents more than 70 of Roachs key research efforts not just on Asia, but also on how the region fits into the broad context of increasingly globalized financial markets. The book argues that the Asia factor is not a static concept, but rather one that is constantly changing and evolving. Broken down into five parts - Asias critical role in globalization; the coming rebalancing of the Chinese economy; a new pan-regional framework for integration and competition; and a frank discussion of the biggest risk to this remarkable transformation - this book will help listeners understand and profit from the worlds most dynamic region.
