

These Mountains Are Our Sacred Places: The Story of the Stoney Indians

These Mountains Are Our Sacred Places is a result of extensive research. After consulting archival records and the Stoney oral tradition, Chief John Snow describes with clarity, depth, and understanding the Native perspective on life since the birth of Treaty Seven in 1877. With compassion and detail, Snow describes the stable state of First Nations prior to contact with Europeans and the destruction wrought by the whisky traders. He records the period of treaty-signing and the failure on the governments part to hold to treaty agreements. And most importantly, Snow explains his peoples feeling of dispossession that continues to threaten the very survival of Stoney beliefs, values, and lifestyle. In his wisdom, however, Snow is also optimistic: about the hope that was born after the introduction of self-government in 1969, following the granting of citizenship to Indian people across the nation; and about his peoples belief in biculturalism as they seek a path that allows them to thrive and benefit from both Native and non-Native cultures, rather than slip between the two.
