

## What Racists Believe: Race Relations in South Africa and the United States (SAGE Series on Race and Ethnic Relations)

Despite its legal abolition, racial inequality persists in many democratic societies. Entering a new era of democracy, South Africa is endeavouring to dismantle its legally structured system of inequality. In practice, however, the structures of consciousness which gave rise to and nurtured a system of white privilege and predominance are tenacious and enduring. In *What Racists Believe*, Gerhard Schutte examines evidence which illustrates how the consciousness of whites in South Africa has been reproduced and maintained, revealing a range of social constructions and typifications of blacks. He concludes with a chapter comparing contemporary racial attitudes in South Africa and the United States.
