

Working Souls: Russian Orthodoxy and Factory Labor in St. Petersburg 1881-1917 (The Allan K. Wildman Group Historical Series)

In spite of the central role played by worker-atheists in the revolutionary narratives of 1905 and 1917, the majority of Russian workers in the late Imperial era continued to view their lives and the society around them through the prism of religious belief, even in St. Petersburg, the most secularized and radical city in the Empire. This book is devoted to their story; while by no means overlooking those who abandoned their faith, it gives voice and visibility to workers who reacted to the material and spiritual poverty of the modern factory in fundamentally religious, though often un-Orthodox, ways. Drawing on a wide range of archival and published sources, this study explores the extent to which the various components of workers' religious identity--their practices, sensibilities, communities, and beliefs about God, self, and society--were transformed by the experience of urban factory life. At the same time, it looks at the myriad ways in which the spiritual needs and demands of the working-class laity precipitated changes in the practice of Orthodoxy--how rituals were adapted, identities reshaped, and communities restructured--enabling the faith to survive in the urban factory environment not just as an archaic remnant of rural consciousness and practice, but as an evolving and sometimes essential dimension of worker culture. No less importantly, this book focuses on the response of the Orthodox clergy to workers' religious and spiritual struggles, with particular emphasis on the moral complexities posed by the crisis of labor in 1905. Finally, *Working Souls* highlights the religious dimensions of the emerging labor and revolutionary movements, and in so doing, reveals important intellectual and moral parallels between the popular spiritual and political revolutions of 1905-17.
